

## MWANJAMA VILLAGE

Population: 350-400 Shia Men, Women & Children

Poor state of the classroom here and there is no adequate space to accommodate all the students either, and many times students find themselves sitting outside the classroom in the heat.

To help these students click below to read more.

MWANJAMA:

Geographical Location &ndash; 40 Kilometres from Mombasa Town.

Population &ndash; 350-400 Shia Men, Women & Children

No words can possibly describe the poor state of the classroom here. It is a small thatched hut with open-windows and un-even flooring. During the rainy season, students cannot even study there as water fills the whole room up. There is not enough space to accommodate all the students either, and many times students find themselves sitting outside the classroom in the heat. Torn charts surround the interior of the classroom which only goes to show more, their state of desperateness. Aims:

- In dire need of a well built and bigger classroom that can accommodate all the students.
- Student's needs must be taken into consideration such as charts, stationery and the like.
- The roof of the mosque needs to be repaired as well.
