

## NGONZINI VILLAGE

Population &ndash; 100 families and 150 children

There is a lot of wasted dry land, and water in the populated area is not available.

They have a &ldquo;bee&rdquo; project which earns them money when they have sufficient honey. However off late, due to the dryness in the area and lack of vegetation and flowers, honey is quite scarce.

## NGONZINI

Geographical Location &ndash; 80 Kilometres from Mombasa Town.

Area- extremely dry and rocky.

Population &ndash; 100 families and 150 children

Visited on: 9th Mahe Ramadhan 1430/ 30th August 2009

There is a lot of wasted dry land & water in the populated area is not available.

They have a &ldquo;bee&rdquo; project which earns them money when they have sufficient honey. However off-late due to the dryness in the area and lack of vegetation and flowers, honey is quite scarce.

Aims:

Need to build a classroom & the washroom needs repairs.

We are currently working towards the water accessibility. Since the area is very rocky which means that no well/ borehole can be dug, water-pipes (4.5 kms in length) need to be put in place.

Total costs is approximately a million Kenya Shs of which we have collected half a million.
